LAYOUT NEED TO BE CMYK TIF FILES  
AT A RESOLUTION OF 300DPI.

The diagram illustrates a template for a three-panel display. It is composed of a large rectangle divided into six sections by a horizontal and a vertical line. The top row consists of three equal-width panels. The bottom row consists of a wide left panel, a middle panel labeled "BACK PANEL", and a right panel labeled "FRONT PANEL". A "GLUE AREA" is indicated at the bottom left. The diagram uses various colored lines to represent different printing requirements: red lines for the outer edges, green lines for fold lines, blue lines for bleed lines, and purple lines for safety lines.
