

OUTER SQUARE: FULL SIZE FOR 4C PRINTING
DASHED INNER CIRCLE: MAXIMUM SIZE FOR FOIL STAMPING

PLEASE NOTE:

Foil stamping on the surface of the Flexi Disk can only retain limited detail.

Text smaller than 6pt or details narrower than .3mm may fill in or not transfer to the Flexi material and become difficult to read.

Designs with a large area of foil stamping (borders, solid-filled shapes) are not recommended. They can warp the Flexi material, effect the audio, and cause production delays.
